

EXTENSION OF AUTHORISATION FOR A MINOR USE OF A PLANT PROTECTION PRODUCT

PLANT PROTECTION PRODUCTS REGULATION (EC) No. 1107/2009

Product name: Mainman

Active ingredient: 500 g / kg flonicamid

MAPP number: 13123

Product authorisation holder: ISK Biosciences Europe NV (Registered Company no. 601473)

Marketing company: Belchim Crop Protection Limited

This Extension of authorisation ends: on the final expiry date of use for the authorised product (unless otherwise stated)

If the authorisation of the above product is withdrawn or amended before the end date above, this Extension of authorisation will end on the same date as the authorisation for the product. This Extension of authorisation will be withdrawn or amended before its end date if a decision is taken to withdraw or amend this Extension of authorisation under Regulation (EC) No 1107/2009 on any other grounds.

Extent of authorisation: United Kingdom

This extension of authorisation for minor uses applies to all UK parallel trade products issued under Article 52 of Regulation (EC) No 1107/2009 for which Mainman with MAPP 13123 is the reference product.

Signed by: Wayne McLeod
Signing time: Friday, December 12 2014, 16:49:4 GMT
Location: CRD York
Reason to sign: For the Health and Safety Executive

HSE Digital Signature

This and the attached Appendices 1 and 2 are signed by the Health and Safety Executive ("HSE") for and on behalf of the Secretary of State, the Welsh Ministers, the Scottish Ministers and the Department of Agriculture and Rural Development in Northern Ireland.

Date of issue: 12 December 2014

EXPLANATORY NOTES

1. This is Extension of authorisation number 2923 of 2014.
2. This Extension of authorisation will be published on the website of the Chemicals Regulation Directorate of the HSE.
3. Application reference number: COP 2014/01678
4. Persons using the product to which this Extension of authorisation applies should acquaint themselves with and observe all requirements contained in the Regulation (EC) No 1107/2009, including the duty on the holder of any Extension of authorisation to notify information on potentially dangerous effects, a contravention of which is a criminal offence under those Regulations.
5. Neither the efficacy nor the phytotoxicity of the product for which this Extension of authorisation has been granted has been assessed and, as such, the user bears the risk in respect of failures concerning its efficacy and phytotoxicity.

ADVISORY INFORMATION

This Extension of Authorisation relates to the use of 'Mainman' (M13123) for the control of peach potato aphid (*Myzus persicae*) and glasshouse whitefly (*Trialeurodes vaporariorum*) on outdoor and protected crops of cucurbits. The product is to be applied by conventional hydraulic sprayer including air assisted sprayer in 600 litres water per hectare.

IMPORTANT: When applying this product under the terms of this notice, comply with any resistance guidance or restrictions stated on the product label.

Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical types or alternative control measures should be included in the planned programme. Alternating with different modes of action is a recognised anti-resistance strategy. Do not apply more than 3 sprays of 'Mainman' per year.

In a program of insecticides use a maximum of two consecutive applications of MAINMAN. If further treatments are required, use at least one application of insecticide having a different mode of action to MAINMAN or alternative non-chemical control methods before applying further MAINMAN.

Strains of some aphid species are resistant to many aphicides. Where aphids resistant to products containing flonicamid occur, MAINMAN is unlikely to give satisfactory control. Repeat treatments are likely to result in lower levels of control. Strains of some whitefly species are resistant to many insecticides. Where whitefly resistant to products containing flonicamid occur, MAINMAN is unlikely to give satisfactory control. Repeat treatments are likely to result in lower levels of control.

MAINMAN is a feeding inhibitor. Do not make repeat applications of any insecticides if it appears not to work at full rate and if the product has been applied correctly. If further treatments are required, use products with a different mode of action.

APPENDIX 1: CONDITIONS OF EXTENSION OF AUTHORISATION

The conditions below are obligatory. They must be complied with when the Extension of authorisation occurs. Failure to comply with the following conditions will result in the withdrawal or amendment of the Extension of authorisation under Regulation (EC) No 1107/2009 and may result in other enforcement action, including prosecution. For the purposes of this Extension of authorisation only, the conditions and/or requirements shown below supersede any corresponding conditions and/or requirements set out on the label or otherwise provided for under the product authorisation **which would otherwise apply**.

Use:

Field of use: **ONLY AS AN INSECTICIDE**

User: Professional

Crops/situations:	Maximum individual dose: (kg product / ha)	Maximum total dose:	Maximum number of treatments: (per crop)	Latest time of application:
Protected crops of courgette and summer squash, cucumber	0.16	-	3	3 days before harvest
Outdoor crops of courgette and summer squash, cucumber	0.16	-	2	3 days before harvest

Operator Protection:

- (1) Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment:
 - (a) Operators must wear suitable protective gloves when handling the product or handling contaminated surfaces.
 - (b) Operators must wear suitable protective clothing (coveralls) and suitable protective gloves when applying by hand-held equipment.
- (2) However, engineering controls may replace personal protective equipment if a COSHH assessment shows that they provide an equal or higher standard of protection.

Other specific restrictions:

- (1) This product must only be applied in accordance with the terms of this extension of authorisation, the product label and/or leaflet and any additional guidance on extensions of authorisation.
- (2) A 7 day interval between applications must be observed.

APPENDIX 2: GENERAL CONDITIONS FOR AN EXTENSION OF AUTHORISATION

Failure to comply with the following conditions will result in the withdrawal or amendment of the Extension of authorisation under Regulation (EC) No 1107/2009 and may result in other enforcement action, including prosecution.

Adverse effects:

The authorisation holder must immediately notify the Secretary of State, the Scottish Ministers and the Department of Agriculture and Rural Development in Northern Ireland (care of the Health and Safety Executive), if they have any new information on the potentially adverse effects of the authorised product, or of residues of an active substance in that product when used in accordance with the conditions of this Extension of authorisation. For those products authorised under Regulation (EC) No 1107/2009 authorisation holders must also tell the other relevant competent authorities of the EC Member States (a list of which is available from the Health and Safety Executive) and the EC Commission. Failure to comply with this requirement is an offence.

Provision of information:

The authorisation holder must comply with all requests for information required by, or on behalf of, the Secretary of State, the Scottish Ministers or the Department of Agriculture and Rural Development in Northern Ireland in accordance with Regulation (EC) No 1107/2009.
