Invasive plants and animals harm the environment, reduce the quality of fishing and spread disease. Please help to stop them by following the Check, Clean, Dry code.

Check your equipment and clothing for living plants and animals. Pay particular attention to areas that are damp or hard to inspect.

Clean and wash all equipment, footwear and clothes thoroughly. If you do come across any plants and animals, leave them at the water body where you found them.

Dry all equipment and clothing – some species can live for many days in moist conditions. Make sure you don’t transfer water elsewhere.

Just a few of the invasive species that are a problem in our waterways?

- Zebra Mussel
- Killer Shrimp
- Floating Pennywort
- Fish diseases
