Just a few organisms to be on the lookout for:

- Zebra Mussel
- Australian Swamp-stonecrop
- Killer Shrimp

Check your equipment and clothing for living organisms. Pay particular attention to areas that are damp or hard to inspect.

Clean and wash all equipment, footwear and clothes thoroughly. If you do come across any organisms, leave them at the water body where you found them.

Dry all equipment and clothing – some species can live for many days in moist conditions. Make sure you don’t transfer water elsewhere.

Remember to check and clean these places:

When you Check-Clean-Dry your boat and equipment every time you leave the water you are helping to:

- reduce the risk of spreading invasive non-native species
- stop them taking over and damaging the environment, spreading disease and harming wildlife
- minimise their impact on your watersports by preventing them clogging up the water body.
